

FUTURA *M* SERIES

All-in-one, electronic key cutting machine

Double cutting station to duplicate flat, dimple and automotive keys.

Wide range of keys cut

In addition to standard keys, cuts cruciform, tubular and keys with protected systems. Cut by copy or by code.

Quiet operation

New motor driver, improved carriage control and a more robust rear bodyshell mean low noise and minimum workplace disturbance.

Fast start-up and stable internet connection

Illuminated on/off button to start both machine and display together. Machine and display take the same internet connection for uninterrupted key cutting.
