

## 1. USERS AND DESCRIPTION OF PRODUCTS

All products referring to this instruction were designed and produced for laboratory, office, industry, work station areas. Because of our compounds, we provide comfortable and hygienic use, what is very crucial for high demanding work environment. Raw materials and parts we use, can be adapted for manufacturing products according to different standards (clean room, antibacterial etc.).

The various elements and parts of our products are protected by corrosion by means of powder coating, nickel plating and galvanization process made on surfaces. Note please, they should not be used for the aggressive environment. Contact with the acids and caustic substances might cause corrosion and damage the elements produced from metal and plastic components.

Choosing the right model, please always consider health and safety regulation & rules and identify necessary requirements for intent use of chair, hoker or stool.

## 2. MANTAINCE

You can clean the seat and back by wiping them with a damp cloth. In case of any bigger smuts, only delicate-care detergents are recommended. It is also necessary to wash out the detergents and dry with a cloth. Metal or plastic parts can be cleaned by a damp cloth using washing detergents. In case of any disinfection required for chairs, stools and hoker using in health care areas, medical centers, it is recommend to use only the proper detergents.

## 3. SAFETY

It is recommend to use the products only as intended. In case of standing on a seat or armrests, overloading etc. there is a risk of an accident. Any modifications in construction of chair, stool or hoker are forbidden.

## 4. ESD CHAIRS

Chairs with Electrostatic discharge properties. Everything that is used along the process of sensitive electronic equipment production, installation or repairing - from hand tools and clothing to furniture and flooring – should meet requirements of antistatic properties. It is recommend to use only chair, stool, hoker with proper, original parts marked as ESD which comes from producer.

In order to maintain ESD properties and safety, product must be mounted according the manual instruction received from manufacturer.

Replacement and exchanging of any parts in ESD chairs, stools, hoker is forbidden and may result in the loss of scattering properties for the finished product.

## 5. WARRANTY

Our products are covered by warranty for a 12 months.

Please note, in case of any modification and changes in construction without acceptance of manufacturer, your warranty will not be valid. Producer shall not be liable for any defect sustained by the holder such as mechanical, chemical, thermal and other damages that can be resulted from incorrect use. All repairs shall be made by proper staff.
