Manufacturer

Kovinoplastika Lož d. d. is an international company with a longstanding tradition; its aim is to meet the customers' demand for functional quality products. We are organized as a single entity joint-stock company with three divisions and many affiliated companies in Slovenia and abroad.

The operations which are performed in accordance with the international certificates obtained, our knowledge and modern technologies, result in a successful performance in all our core product lines.

We are developing business excellence and making investments in the development in all the strategic areas. Our products and services are marketed under trademarks which are managed by ourselves and with the help of our partners.

Besides its distinctive quality, the building hardware of Kovinoplastika Lož has an excellent quality-to-price ratio, providing Kovinoplastika Lož with a fast and effective strategy of winning market positions both in the European Union and other European countries.

The ARX building hardware made by Kovinoplastika Lož - turn & tilt hardware for doors and shutters are the most distinguished. Is available on selected international markets, where Kovinoplastika Lož markets its products and effectively manages them with its own subsidiaries, whereas the others are managed by maintaining long-lasting and successful partnerships with local companies.

It must be pointed out that Kovinoplastika Lož was the first company in the world, which developed and patented the system of multi-point door locks, operating on the lever principle.

Besides managing production development and marketing all the programmes of building hardware, Kovinoplastika Lož ranks successfully among the top kitchen sink suppliers and gastronomic dishes for professional kitchens under our own trademark ALVEUS.

Compatibility of components to ensure reliability of operation

The ARX building hardware is new hardware for windows, balcony doors and door locks, being a product of our own development. We are an European hardware manufacturer from Slovenia, with extensive experience in the field of development, production and marketing of the most complex hardware for windows and doors.

The ARX building hardware is fully reliable and adjusted to hard climate; it combines the following features:

Innovation of functional solutions

- High-quality material
- High quality production and installation of individual hardware sets by using highly automated production
- Hardware is easy to maintain, providing a simple and environmentally friendly degradation
- A wide range of use
- Long-term operation and simple installation
- Offers the possibility of high level of automation assembly hardware on the window sash and frame
- Proper surface protection ARXCoat, providing good anti-corrosion durability and a trendy silver appearance, all due to the hot-dip galvanizing process

With a thoroughly made - out design, the ARX building hardware will add a new value to your windows and balcony doors.

Manufacturer's standards and certificates

In January 1994, Kovinoplastika Lož acquired the ISO 9001 compliance certification. After that in 2002, the company was successfully recertified and acquired the ISO 9001:2000.

In 2009, Kovinoplastika Lož acquired an important certificate - ISO/TS 16949, proving appropriate compliance certification for implementing appropriate environmental policy.

Kovinoplastika Lož was the first big industrial company in Slovenia to gain the ISO 14001 compliance certification for implementing appropriate environmental policy.

Product warranty and liability

ARXcasement hardware has been designed to provide simple, yet complete solutions for casement windows. It meets the most stringent security and weather performance requirements of EN BS standards, making the windows equipped with **ARXcasement** components both burglar-proof and economical in terms of energy consumption.

UNIVERSAL

ARXcasement fittings are suitable for use on any PVC, timber or aluminium windows with Eurogroove (9.3 mm +0.7/ -0.2 mm).

SECURITY CAMS

Adjustable mushroom cams are an integral part of **ARXcasement** hardware. They provide extra security and allow for easy adjustment of compression to achieve perfect weather-seal.

UNIVERSAL ROUTING

For ease of fabrication there is one UNIVERSAL ROUTING detail across all **ARXcasement** products.

ARXCoat SURFACE

ARXcasement hardware delivers the very best corrosion resistant in the market, exceeding Grade 5 of BS EN1670, which is minimum 480 hours exposure to salt spray.

MANUFACTURE

All **ARXcasement** products are manufactured to the normal High-Tec, High Quality standards expected from Kovinoplastika Lož d.d..
